Why Choose AL NAYZEK ?

The Way We Work

Our way of working is based on clear procedures, time commitment, and operational requirements. We focus on delivering our services in an organized and efficient manner to ensure our clients' needs are met accurately and reliably

Our Culture

Our values align with those of our clients. We believe in commitment, quality, and achieving reliable results. Our objective is to deliver services that meet project requirements and client expectations at a professional level

Technical Knowledge

Our operations are supported by qualified and experienced technical personnel. We possess the practical technical knowledge required to understand job details and provide suitable solutions in line with safety and industry requirements

Why Choose AL NAYZEK ?

Cost Effective

We provide fair and well-structured commercial offers based on mutual benefit, ensuring value for money while maintaining service quality

Practical Experience

With long-standing practical experience in field operations, we are capable of handling operational challenges efficiently and delivering effective, practical results.

Trust

Trust is the foundation of our relationship with our client. We are committed to what we offer and strive to build long-term partnerships based on reliability and professionalism

Rig Moving Services

AL NAYZEK DRILLING & OIL Services L.L.C. provides professional rig moving services, supporting onshore drilling operations with a strong focus on safety, planning, and execution.

Our rig move operations are carried out through well-structured procedures, including site assessment, lifting and transportation planning, and controlled execution to ensure safe and efficient relocation of drilling rigs.

With extensive field experience, our teams are capable of handling rig mobilization and demobilization activities while minimizing downtime and maintaining compliance with operational and safety requirements.

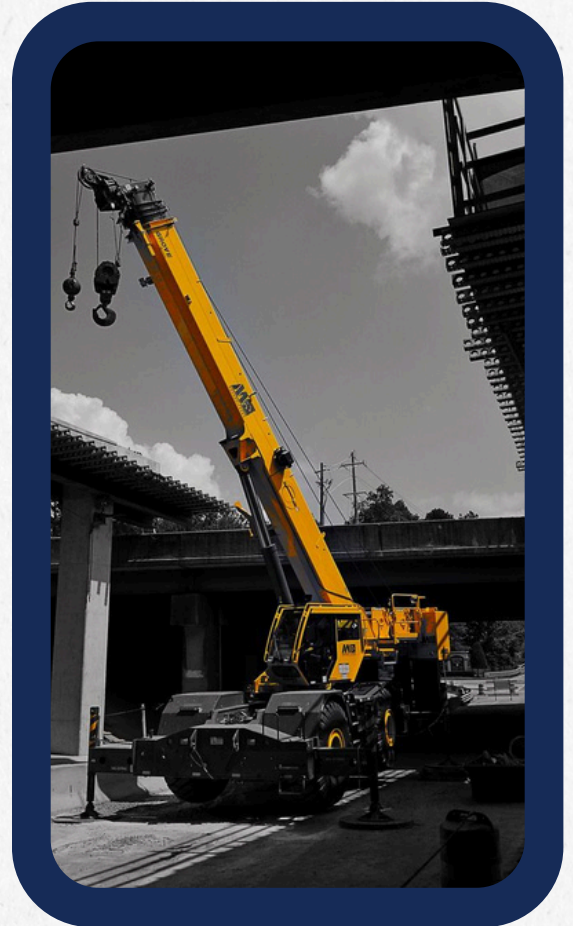

We are committed to delivering reliable rig moving solutions that support continuous operations and meet project-specific needs

Crane & Lifting Equipment Inspection

AL NAYZEK DRILLING & OIL Services L.L.C. provides professional inspection services for cranes and lifting equipment, supporting safe lifting operations in accordance with applicable industry standards.

Why Choose our Inspection Services?

- **High Quality Inspection**
Our inspections are conducted in line with recognized international reference standards to ensure safety and compliance.
- **Cost-Effective Solutions**
We support our clients by providing practical inspection solutions that align with operational requirements and budget considerations
- **Timely Certification**
Inspection reports and certificates are prepared and issued without unnecessary delays to support continuous operations.
- **Follow-Up & Client Support**
Our team follows up on inspection findings and provides ongoing support to ensure quality assurance throughout operations.
- **Fast Response**
We respond promptly to inspection requests to minimize downtime and maintain operational continuity

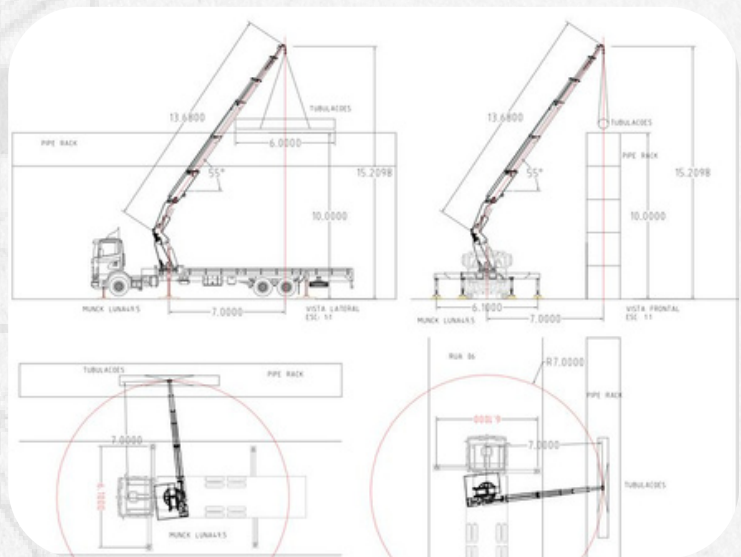

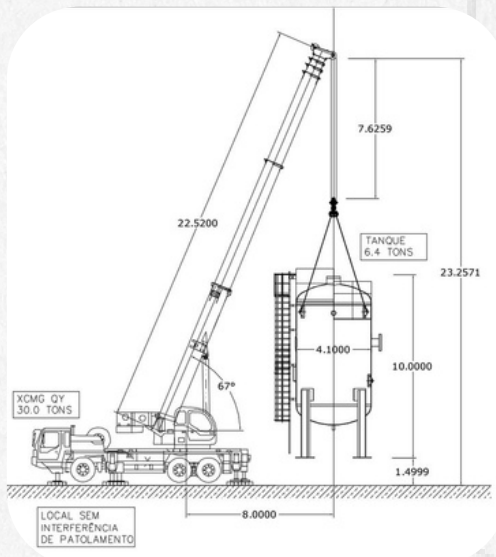

Scope of Inspection Services

Our inspection services cover a wide range of lifting and handling equipment, including but not limited to:

- Cranes (mobile, crawler, and gantry)
- Man riding baskets and elevators
- Containers and storage baskets load testing
- Safety harnesses and other personal protective equipment
- Forklifts
- Pad eye testing
- Excavators and earth-moving equipment
- Lifting accessories such as slings, shackles, chains, and wire ropes

PLANNING AND SUPERVISION OF LIFTING OPERATIONS

Having a lifting plan which is prepared according to safety and lifting international standards and implementing it under supervision of a competent person to avoid the occurrence of these risks and save time in safe and professional way.

Lifting Plan Section is an important planning process

That will identify all hazardous situations that might be encountered during lifting process according to international standards and contains the roles and practices of all persons involved in the operation like (Lifting supervisor, Banksman, Crane Operator, Rigger, Flag man, etc.,) taking ground and weather condition in consideration.
